AnySMP

MEMBER GUIDE

Everything you can do on your server with AnySMP.

Level up, gamble coins, plan raids and keep playing in your browser – explained in a few minutes.

1 How to use the bot
2 Player portal in the browser
3 Levels, XP & achievements
4 Coins & shop
5 Games
6 Raids & events
7 Mythic+ key board (WoW)
8 DKP
9 Voice channels, tickets, polls
10 Troubleshooting

1 How to use the bot

AnySMP works with **slash commands**. Type a slash `/` in the chat – Discord then shows all available commands with a short description. Pick one and fill in the fields Discord offers.

> **EASIEST WAY: /MENU**
>
> `/menu` gives you buttons for the essentials: **Create raid**, **Events**, **Character/class**, **DKP**, **Away** and the **Portal** – no commands to learn. Dates also work as “today”, “tomorrow” or “DD.MM.”. Many servers also have a pinned 📌 **raid board** with the same buttons.

- `/help` shows every command **you can use on this server** – sorted by area, with links to the guides.
- **Right-click a member → Apps: rank card**, **profile**, **wishlist** and **rob** without typing (moderators also get **warn**).
- Related commands have **subcommands**: type e.g. `/chess` and then pick `move`, `board` and so on.
- Many replies are visible **only to you** (Discord says “Only you can see this”) – e.g. error messages or your balance shown to others.
- Announcements such as raids or polls have **buttons**. One click is enough, no command needed.
- **Pick roles & apply:** if your server has a **#role-selection** channel, give yourself faction and game role there by button (click again to remove). With 📝 **Apply** you fill in a short form – the answer arrives by DM.
- **Find a guild: anysmp.de/gildenfinder** lists guilds that are recruiting – filter by game, faction, language and wanted role, with a direct join link.
- **Get found yourself (16+):** `/find-guild create` creates a profile – game, display name, roles, play times, a few sentences about you. Only your display name is public, never your Discord name. Guilds send you a request by DM from the bot; only when you click “Interested” do they get your Discord name. The profile expires after 30 days, `/find-guild delete` removes it right away.
- The bot answers in **your Discord language**. Public messages use the server's language. Discord also shows the **command names** in your language, e.g. `/absence`.

> **TIP**
>
> Can't see a command? Your server has probably limited it to certain roles. Ask the admins.

2 Player portal in the browser

anysmp.de/play is your personal overview: at the top are your next raids with your status – “Coming”, “Maybe” or “Can't” in one click. Plus level, coins, achievements, calendar and games

against other members – all in the browser, on your phone too. You can hide your reliability from other members there (admins and raid leads still see it). **Polls**, **betting office & lottery** (place bets, buy tickets, oracle ranking) and your **loot wishlist** work there by click as well.

How to log in

1. Type `/web-login` on your server.
2. The bot sends you a **direct message** with a personal link.
3. Click the link – you're logged in instantly. No password, no typing.

The link is **valid for 5 minutes and works once**. After that you stay logged in – in the app and the browser for up to a year, every visit extends it. If the link no longer works, just get a new one with `/web-login`. The code is also in the message in case you want to type it in.

📱 As an app on your phone

On Android you can install the portal like an app (Google Play: AnySMP). Raid reminders, bench alerts, betting deadlines, lottery draws and the answer to your guild application then arrive as push notifications – even without Discord. Long-press the app icon to jump straight to raids, absence, DKP or who's playing. A number on the icon shows how many raids in the next 7 days still await your answer and in how many games it's your turn. Offline, the app shows overview, raids and DKP as last loaded. On several AnySMP servers you switch at the top of the sidebar – without a new login code. **Widgets** (app 1.4.0+): long-press the home screen → Widgets → AnySMP, then tap 📲 **Connect widget** in the portal overview – it shows your next event with a countdown; a tap opens exactly that raid. There are also **DKP** and **Who's playing?** widgets. **iPhone:** open anysmp.de/play in Safari → Share → “Add to Home Screen”.

🗓️ Raids in your own calendar

The portal has a personal calendar link. Subscribe to it in Google, Apple or Outlook and your raid sign-ups appear in your calendar automatically.

IMPORTANT

Don't share your login link or calendar link – with them someone could pose as you or see your events. You can renew the calendar link in the portal at any time.

3 Levels, XP & achievements

You earn **XP** automatically when you chat (at most once a minute, so spam is pointless) and when you're in voice channels – the AFK channel gives no XP, and some servers don't count muted time or time alone in a channel. Servers can hand out their own roles for each level.

Command	What it does
`/rank [member]`	Your level card as an image: level, XP progress, coins, activity over the last 14 days. `farbe:` picks your colour theme (e.g. gold or violet) – also in the portal under **Leaderboard**, where you can hide yourself from the public leaderboard if your server has one.
`/leaderboard`	The server's ranking – by level, messages, voice time or **XP this month** (restarts every month; also in the portal under **Leaderboard**).
`/achievements [member]`	All achievements – unlocked and open. The bot announces rare ones with a card.

⏰ `/bosses`: upcoming world bosses and events. 🛡️ `/gear`: enter item level or gear score per game – some events require a minimum. 🏆 **Tournaments**: sign up by button, enter your match result with `/tournament result`. 🙈 `/spoiler`: choose your story progress – you only see spoilers up to that point. 🖥️ `/server`: status and next wipe of your game servers. 🕹️ `/lfg`: **Play now** – look for teammates (game, slots, platform, mic); whoever joins lands in their own voice channel. 🎮 `/games`: choose your games – you see their channels and get mentioned for their events. 🕒 `/planner times` (or **My times** in the portal): enter when you usually have time; `/planner show` shows when most people can. 💜 `/vote`: vote for the bot and collect your reward. 🗺️ `/roadmap`: help decide what comes next.

📅 Weekly recap, anniversary & birthday

If your server has a community channel, a weekly recap appears there every **Monday**: raids, the most active members in chat and voice, the betting king, lottery winners, new achievements and – for WoW guilds – the best parse. On the **1st of every month** the bot crowns the **players of the month** there – the top 3 by XP in the previous month, depending on the server with coins and a role for first place. On the anniversary of your join date the bot congratulates you on your **guild anniversary** and gives you 100 coins per year.

Enter your **birthday** with `/birthday set` (or in the player portal under Profile) – day and month only, visible only on this server. On the day the server congratulates you at 10 am, you get 250 coins and, if set up, the birthday role for 24 hours. `/birthday list` shows upcoming birthdays,

`/birthday remove` deletes yours. When the server reaches 100, 500, 1000 … members, there's a celebration and coins are raffled among members active in the last 30 days. Some servers also post a **question of the day** – just answer in the thread below it.

🔥 Sale radar: Steam deals

Put Steam games you want to buy on your wishlist with `/deals add` – type the name and pick from the list, or paste the Steam link. As soon as one is on sale (by default from 25 % off), the bot reports it in the free-games channel and pings you. `/deals list` shows your games, `/deals remove` takes one off.

📇 Profile & 📜 chronicle

`/profile edit` fills in a small **profile** (name or nickname, age, main, hobbies, a few sentences about you) – all optional and only visible on this server, also in the player portal under Profile. If the server has a public guild page, you only appear there if you tick the box in the portal – and only with your profile or character name. Others see it with `/profile show` or by right-clicking you → Apps → Profile. The **guild chronicle** (`/chronicle` or in the portal) lists your guild's milestones – browse with ◀️ ▶️.

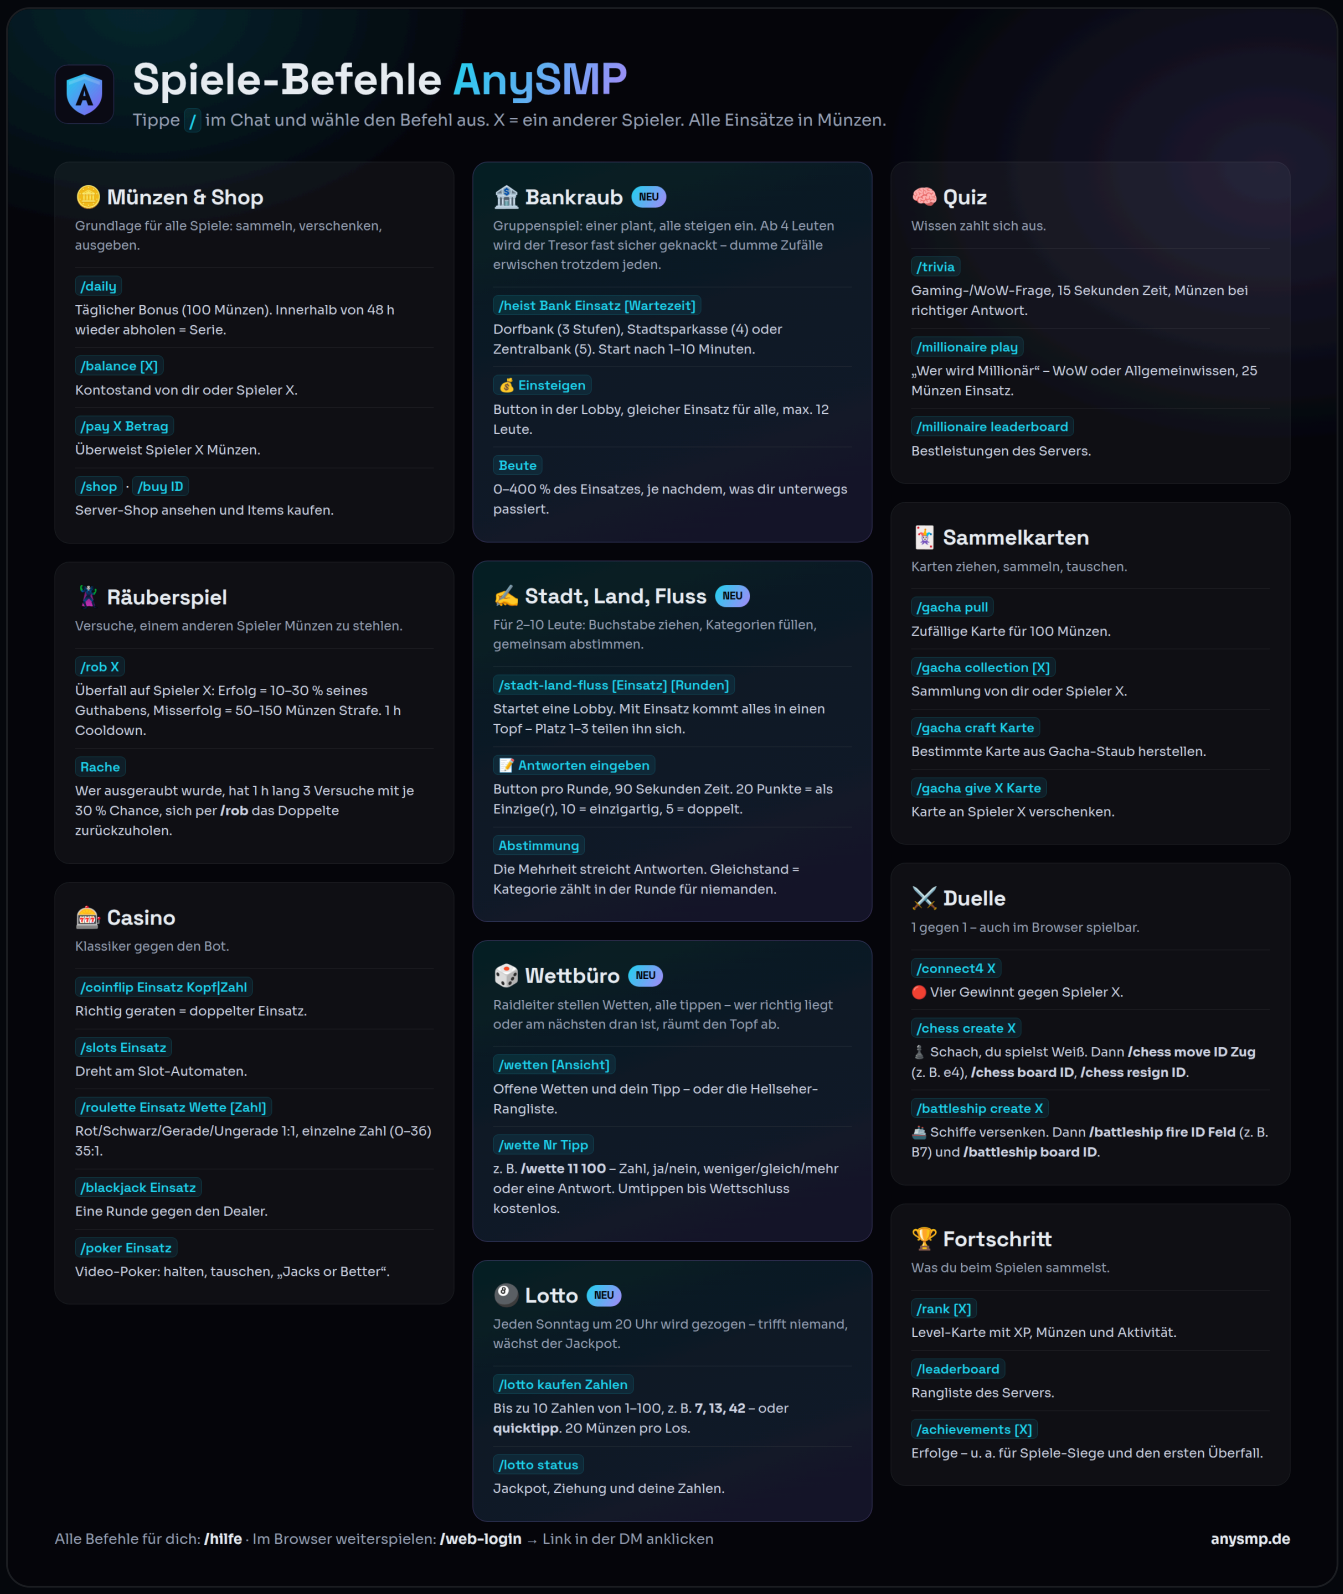
4 Coins & shop

Coins are your server's currency (it may have another name there). You need them for the games and the server shop.

Command	What it does
`/daily`	Daily bonus of 100 coins. Claim it again within 48 hours to grow your streak.
`/balance [member]`	Balance of you or another member.
`/pay member amount`	Give coins away.
`/shop` · `/buy ID`	View the server shop and buy something (e.g. roles, titles or colours).

5 Games

All games at a glance – the same overview is also available as an image for sharing:



Bank heist – how it works

1. Someone starts a heist with `/heist`: choose a bank, set the stake, optionally the waiting time (1–10 minutes).

2. Everyone else clicks 💰 **Join** in the announcement and pays the same stake. Up to 12 people fit into the crew.
3. After the waiting time the bot narrates the heist step by step: break-in, vault, getaway … Each step stays for a few seconds.
4. At the end comes the payout: everyone gets 0–400 % of their stake, depending on what happened to them along the way.

The more people join, the safer the vault gets cracked – from 4 people almost always. Bad luck can still hit anyone: whoever falls off the ladder or jumps into the wrong getaway car leaves empty-handed.

✍️ Scattergories (Stadt, Land, Fluss) – how it works

1. Someone starts a lobby with `/scattergories` – optionally with a stake and number of rounds. Everyone else clicks **Join** (2–10 people).
2. Each round the bot draws a letter. Click 📝 **Enter answers** and fill in the categories. You have 90 seconds and can change your answers until then.
3. Then you vote: in the lists you choose which answers of the others **don't** count. The majority decides. On a tie, the whole category doesn't count for anyone that round.
4. Points: **20** if you're the only one with a valid answer, **10** for a unique answer, **5** for a duplicate. At the end places 1–3 share the pot.

🎲 Betting office – how it works

1. A raid lead or mod opens a bet, e.g. “Bet 11: How many die on trash in the next raid?”. It has a fixed stake and often a deadline. Many servers have a dedicated channel like **#betting-office**.
2. You bet with `/bet 11 100` – depending on the bet a number, **yes/no**, **less/equal/more**, or for choice bets (“Who dies first?”) the number or name of an answer. The stake is deducted on your first bet; changing your bet until the deadline is free.
3. Bets stay secret until the deadline. `/bets` shows all open bets and your own guess.
4. After the event the bet is resolved: whoever is right – for numbers: whoever is closest – shares the whole pot, sometimes with a **house bonus** on top. If nobody is right, stakes are refunded.

The best tippers appear in the **oracle ranking**: `/bets ansicht:` “this month” or “all time”. Wins unlock their own achievements – up to “Oracle” for three hits in a row.

🎱 Lottery – every Sunday at 8 pm

- `/lotto buy zahlen:7, 13, 42` or `/lotto buy quicktipp:3` – numbers from 1 to 100, up to 10 tickets per week, 20 coins per ticket.
- Whoever has the drawn number wins the jackpot (several winners share it). If nobody hits, the jackpot keeps growing. The draw appears in your server's lottery channel.

- `/lotto status` shows jackpot, draw time and your numbers.

🦹 Robbery and revenge

`/rob member` tries to steal 10–30 % of someone's coins – if it fails, you pay them a fine. If you were robbed yourself, you have **3 attempts** within an hour, each with a 30 % chance, to take back **double** from the robber – just `/rob` them.

> TIDY CHANNELS
>
> The bot cleans up after itself: game messages such as lobbies and boards disappear after an hour, results stay for 24 hours.

♟️ Keep playing in the browser

Connect Four, chess and battleship can also be played in the player portal – with a clickable board. A match started in Discord continues in the browser and vice versa.

6 Raids & events

Raids, group events and guild meetings appear as announcements in your server's raid channel – with title, game, time and the free slots per role. 🤝 = joint raid with a partner guild. Free slots of other guilds are listed in the portal under 🌐 **AnySMP network**.

Signing up

- Click the button of your **role** (e.g. tank, healer, DPS). Clicking another role switches it.
- **Class:** in Aion 2, Lost Ark and FFXIV the bot asks for your class or job on your first sign-up and remembers it (change with `/characters`). The announcement shows how many of each class are in.
- 🪑 **Bench:** you step in if someone drops out.
- ❔ **Maybe:** the raid lead sees it, you don't take a slot; the bot reminds you before the raid. Some servers count it as a decline shortly before start. “Interested” on the Discord event also counts as “maybe”.
- ❌ **Decline:** say no if you can't make it after all – it helps planning.
- 🏖️ **Holiday?** `/absence add von:10.10. bis:20.10.` (or **Away** in /menu, or **Absence** in the portal) – the bot declines all raids in that period for you, including ones created later.

🔔 **Reminders by DM:** if you've joined raids recently, the bot reminds you once if you haven't responded to tomorrow's raid yet – likewise shortly before a betting deadline and before the lottery draw, if you usually take part. Turn it off: “No more reminders” button in the DM, `/reminders aus` or in the portal.

The same works in the player portal under **Raids**: calendar, list, sign-up by click and your personal history. `/raid-list` shows upcoming events in Discord too.

⏰ Reminder

30 minutes before start everyone signed up gets a reminder. If you haven't responded yet, you can accept or decline right in the DM. When the raid is full, the bot automatically creates a voice and text channel for the group.

🪑 Bench alert

If someone is missing shortly before start, the bench gets “I'll step in” – whoever clicks first plays. For core groups (⏳) the bench moves up automatically.

Heists & races: in a heist you pick your role (planner, driver, hacker, shooter) and use 📦 to enter what you bring. In races the raid lead enters the placings after the start; `/race` shows the season standings.

Consumables check: if the event has a list (flask, food ...), tick off what you have via 🧪 on the announcement or in the portal – the announcement shows how many are complete.

Trial period: after being accepted, depending on the server you're on trial for a few days – often with a mentor who helps you. Play along and sign up for raids; the leadership decides afterwards.

Guild bank wishlist: in the portal under Guild bank you can wish for mats or potions – even ones the bank doesn't have. Whoever can craft it gets a DM and accepts with “I'll do it”; you get notified.

Clan league & internal matches: `/league table` shows the season (quarter) – points come from raids, races, tournaments and internal matches. `/league inhouse` splits everyone in your voice channel into two equally strong teams (by Elo), `/league elo` shows the ranking.

Who's playing what? In the board channel and the portal (🟢) you see live who's playing what. “Play along” immediately starts a teammate search (/lfg) for that game.

Strategies: in the portal under Raids → 📋 Strategies (or with `/planner strategy`) you see the sketch and your task as tank, healer or DPS before the pull.

Shared games & map strategies: under Games → 📚 you see which games most of you own on Steam (counts only). Shooter teams find smokes and setups per map under 📋 Strategies – the scrim page links them directly.

Mentoring, photo wall & training: if you have a mentor, the bot asks you both by DM every Monday how it's going (👍 🤷 👎). Under 📸 Photo wall you'll find the screenshots from the clip channel per event. You can upload pictures and clips there yourself (up to 10 MB) – in the Android app directly via **Share** → **AnySMP**. After a training session you tick off via 🎯 which goals you reached; 🎯 Training in the portal shows your attendance.

Clan duels: your leadership can challenge other servers – the duel then appears as a normal event in the raid channel. `/league clans` shows where your server ranks.

Crew (portal → Crew, `/crew`): with `/crew car` and a picture you add your car to the crew garage – ⭐ below it is a vote, on Sundays at 7 pm the “car of the week” is crowned. `/crew cash` shows the crew fund (in-game money, booked by the leadership). Create your RP

character sheet (character, job, background, relationships) in the portal and submit it for approval; `/crew rp` shows it.

> **SIGN-UP DEADLINE**
>
> Some recurring raids have a sign-up deadline – it's in the announcement. After that you can only decline.

World of Warcraft: add your characters

With `/char add` (or in the portal under **In-game characters**, also via Battle.net import) you store your characters with class and role. The import shows max-level characters; the bot recognises the version by realm (Forever: first and last name, no realm). When you sign up for a raid, the bot picks the right character – so your alt heals while your main tanks.
`/char set-class` changes class or role, `/char stats` shows gear, Mythic+ and raid progress, `/logs char` your parses (Pro). The 🛡️ in the portal opens the **armory profile**, signature image and **simulation** (WoWSims/Raidbots).

7 Mythic+ key board (WoW)

Mythic+ groups have their own board that sorts runs by purpose: 🚀 push, 🔒 vault and 🌱 alt & support.

Command	What it does
`/key create`	Create a new run – right now or with date and time for later.
`/key join`	Join an open run.
`/key board`	All open runs by category.
`/key complete` · `/key cancel`	Complete or cancel a run (creator).

Experienced players helping in an alt run are marked as 🧑‍🔬 **mentor** and get coins and gacha dust on completion.

8 DKP

If your server uses DKP, you earn points for attendance and boss kills and spend them on loot. `/dkp balance` shows your balance with history, `/dkp list` the ranking – with several lists you pick one with `liste`. In the portal you'll find both under **DKP**, and in `/menu` under **DKP**.

🎁 Loot wishlist

Enter what you need from which boss: `/wishlist add boss:Mythrax item:Ring of Eternity`.
`/wishlist show` shows your list. The raid lead sees with `/wishlist boss` who needs what and awards the item – depending on the server via DKP, Suicide Kings or EPGP. Who's currently

ahead is shown in the portal under ⚖️ **Loot distribution**; the **priority list** shows which class or role gets an item first.

Guild bank: 📦 **Make a request** in the bank channel or in the portal; donations earn coins. In game, `/anysmp craft` or the button below the profession window opens the crafters with online status, materials and shopping list (AnySMP addon 1.5.0+). From 1.10.0, `/anysmp` opens the guild window with members, calendar and guild crafters; under **Members** you assign your alts to your main. 🛠️ **Guild crafters** (portal): enter professions (or via the 🧩 **AnySMP addon** from the game), search under **Who can do what**, ask crafters.

Import (portal → Wishlist): export from LootReserve/softres.it or Wowhead links. 🎯 **Soft reserve:** click **Reserve** on the announcement, enter 1–3 items – if one drops, only those who reserved it roll.

9 Voice channels, tickets, polls

🔊 Your own voice channel

Join the "+ Create channel" channel (the name varies by server) – the bot instantly builds your own voice channel and moves you in. It disappears as soon as it's empty.

- `/voice lock` · `/voice unlock` – lock/open
- `/voice limit` – user limit
- `/voice rename` – rename

Streaming? `/stream-guard on` adds a ⚠️ warning sign ⚠️ to your channel and warns everyone who joins. Troublemakers get kicked with `/stream-guard lock` and can't come back. With a linked Twitch/TikTok/YouTube (set up by an admin) this happens automatically.

🎫 Tickets

Need help from the server team? Click **Open ticket** in the ticket channel or choose what it's about (e.g. DKP or application) – then the right people are involved right away. A private channel just for you and the responsible people is created. One open ticket per person at a time.

📊 Polls

Click an answer to vote. Clicking the same answer again withdraws your vote. You see the result live in the message. For a **game night** (`/poll game-night`) the bot suggests games many of you own on Steam; the winning game automatically becomes an event. Link Steam in your player profile for this.

10 Troubleshooting

Problem	Solution
No DM from the bot	In Discord: right-click the server → **Privacy settings** → allow **direct messages**. Then run `/web-login` again.
Login link doesn't work	It's only valid for 5 minutes and works once. Get a new one with `/web-login` .
Command missing	`/help` shows what you can use here. If it's missing there, the server has limited it to certain roles or turned it off – ask the admins. Many commands are now subcommands, e.g. `/dkp balance` .
“Not enough coins”	Claim `/daily` or play with a smaller stake.
Raid sign-up doesn't work	The role is full (then bench) or the sign-up deadline has passed. If it says “Signed up”, the raid lead is still assigning you.
Bet doesn't accept my guess	The deadline has passed (often the raid start), or it's your own bet – whoever opens a bet resolves it and can't bet on it.
Lottery: “At most 10 tickets”	10 numbers are allowed per week. `/lotto status` shows which ones you already have.
Question, bug, idea?	Join our **support Discord**: **discord.gg/VEGg4MqSDy** – or write to support@anysmp.de.
Lost this guide?	This guide and the games overview are always available at **anysmp.de/#anleitungen** and in the player portal under **Help**.
